## STRYKER CROSSBOWS BLAZE COMPETITION WITH NEW STRYKEZONE 380

EUGENE, Ore. — Stryker Crossbows, the premium choice for serious crossbow shooters, unleashes the blazing fast StrykeZone 380. Driving bolts at a blinding 380 feet per second, it's the fastest member of the all-new highperformance StrykeZone collection.

Sam Coalson, Director of Marketing for Stryker Crossbows, said the StrykeZone 380 utilizes an impressive blend of cutting-edge technologies to produce reliable, lightweight power in any condition.

"Our unique piston design allows the trigger pull to be independent of the bow's holding weight combined with a double sear ensures an ultra-light trigger pull. The double jaw string capture protects the trigger mechanism from the elements, promising a clean release in any weather," Coalson said. "The StrykeZone delivers impressive power with an easy draw and the KillSwitch™ trigger seals the deal with less than three pounds of trigger pull and fraction of an inch of travel."

The StrykeZone 380 comes equipped with Octane string and cables for maximum quality and precision-engineered cams with an unbelievable 19 3/16" axle-to-axle measurement and a 15.5" power stroke.

Two features make Stryker Crossbows the safest on the market today: the Auto-Flip™ magnetic safety that clicks into the safe position every time the bow is cocked and is engineered to click back into safe mode if the crossbow is dropped or the bolt is removed. The Cease-Fire™ safety plug is a double barred insert that slides into place, locking the jaws and immobilizing the trigger until you remove it and are ready to shoot.

SPECIFICATIONS SPECIFICATIONS			
Power Stroke:	15.5"	A to A:	19 3/16"
Kinetic Energy:	123 fpe	Weight:	7 lbs
Draw weight:	160 lbs	MSRP:	\$749
